

COVID-19

Symptomatic

What to DO if:

Symptoms only

Self-isolate until results. If **negative**, isolate until symptom free for 24 hrs

Return from Out of Country

Self-isolate for 14 days from date of return and must be symptom free for 24 hours *(Even if your result is negative)*

Exposure: Close contact with someone COVID-19 positive

Self-isolate for 14 days from the last date of exposure or 10 days from the start of your symptoms; whichever is longer. *(Even if your result is negative)*

Close contact to someone with symptoms

Self-isolate until results. Follow rules for exposure if contact is positive

COVID-19 Alert APP

Self-isolate for 14 days from exposure or if unknown; from date of alert

If your result is positive; follow isolation instructions from Public Health
