

Department of Family & Community Medicine Nursing Services

ST. MICHAEL'S
UNITY HEALTH TORONTO

Family Practice Nurses support the health needs and care of patients across the lifespan. They focus on providing assessment, screening, healthy lifestyle support, education and chronic disease management with a goal of improving health outcomes. Family practice nurses work with all members of the health care team to support patient centered care.

SERVICES PROVIDED

Acute Services:

Walk-in assessment, telephone triage

Chronic Disease Management:

COPD, diabetes, smoking cessation, hypertension, post-hospital discharge, addictions, case management

Healthy Living:

Preventative health screening, well-baby visits, vaccination review, routine injections, breastfeeding support, prenatal care, motivational interviewing on lifestyle changes, service linkages, access to resources

HOW TO SEE A NURSE

- Nurses are available at each clinic and support many different types of appointments
- Depending on the reason for your visit, you may see a nurse at your next appointment
- Patients can book an appointment with nurses for vaccines and injections, blood pressure checks, wound care, wart treatment, education and additional health teaching
